

Inflation and Mather-Thurston

Gaël Meigniez

Université Bretagne Sud, Vannes, Francia

"The classical Mather-Thurston theorem gives an isomorphism between the homology of two classifying spaces: one is associated to foliations, and the other is associated to diffeomorphism groups. I'll explain a new proof of this theorem."

Data: Venres 18 de xaneiro de 2019.

Lugar: Aula 7, Facultade de Matemáticas.

Duración: 1 hora.

Hora: 11:00h.
